Subject: Cancer epi quality table
Attachments: Formaldehyde - Study Quality Tables - Leukemia_24Sept2012.docx; LHP_synthesis (August 10).docx; URT_synthesis [NPC, SN, OHPC, Larynx] (August 10).docx

Mary,

Great to have you onboard! As we discussed, here are the cancer epi write-ups:

LHP_synthesis
(August 10).docx

URT_synthesis
[NPC, SN, OHP...]

We are looking for a single table with one row for each study and columns of relevant data on which to evaluate quality (which can be copied/transferred from the above evidence tables). Below is the beginning of such a table that Glinda Cooper started and is similar in nature to the work she and Barbara have done for the non-cancer epi studies.

So first, please review the materials we have already developed and we will look at what you did for your thesis. Then, let's meet next Friday to decide on how we want to proceed. It would be helpful if you had short examples of alternatives to Glinda's approach if you favor such alternatives.

David already has long-hand text for a good number of the studies in a format to match what Glinda has done but before he enters it into a table, let's decide if we'll used Glinda's template as is or tweak it based on what you have done.

Thanks,
Tom
